

PHISON

Erase gaming boundaries with the **Phison-powered E21T SSD** for faster gameplay and runtime

We started the revolution with Gen 4 NVMe SSD controller enabling innovative technologies that power SEAMLESS gaming experiences.

The upcoming next generation E21T controller provides up to 25% improvement in performance and power consumption over previous generation (E19T). Our transition from 28nm to 12nm process technology will trigger a new wave of design-in opportunities and will continue to be a great solution for console, PC/laptop, and mobile gaming.
