Dear Investor/Analyst/Shareholder,

Thank you for your support for Phison (8299TT). Please see the details of our August 2021 revenue below:

KEY TAKEAWAYS

- August 2021 revenue totaled NT$5.707bn (the highest in a single month in history), while accumulated revenue for Jan.- August 2021 reached NT$39.987bn, hit the record high for the same period in history.
- The gradual resumption of operations of enterprises, factories, stores, and schools, coupled with the continuous popularization of 5G technology in various system applications, directly drives the related demand of the NAND storage industry.

Phison Electronics (8299TT) announced today (9/6) the results of its operations for August 2021. Consolidated revenue was NT$5.707 billion, an increase of 52% (YoY) from the same period last year, setting the highest in a single month in history. The cumulative revenue of the year to August reached NT$39.987 billion, a 28% increase (YoY) compared to the same period last year, setting a new record for the same period in history.

PHISON 8299	Sales Revenue (NT$bn)	YoY	Remarks
August 2021	5.707	52%	The highest in a single month in history
Jan. to August 2021	39.987	28%	Record high for the same period in history

Compared with the same period last year (YoY), the total shipments of PCIe SSD controllers in August grew by more than 250%, setting a new monthly high in history; and the total shipments of industrial memory modules grew by 40%. In addition, for the annual growth rate (YoY) of total shipments accumulated throughout the year (January to August), the total shipments of PCIe SSD controller grew by nearly 145%, a record high for the same period in history; the total annual growth rate of industrial memory module shipments is nearly 36%, and the annual cumulative total memory bits shipments (Total Bits) also grew by nearly 50%, both of which set new historical highs over the same period.

August 2021 Business Highlights (PHISON 8299)	YoY	Remark
Total shipments of PCIe SSD controller	250 %	Historical one-month high
Total shipments of industrial memory modules	40 %	
Accumulated total shipments of PCIe SSD controller for Jan.- August	145 %	Record high over the same period
Accumulated total shipments of industrial memory module for Jan.- August	36 %	Record high over the same period
Accumulated total memory bits shipments for Jan.- August	50 %	Record high over the same period

August has entered the traditional third season peak season. Although there are many noises such as slowing demand in the market, the gradual resumption of operations of

enterprises, factories, stores, and schools, coupled with the continuous popularization of 5G technology in various system applications, directly drives the related demand of the NAND storage industry. In addition, the tight capacity of the semiconductor supply chain has not seen any signs of relief in the short term, and even the supply chain has continued to see price increases to reflect the supply and demand situation in the market. Phison will also continue to communicate and cooperate closely with customers and partners around the world to reduce the impact of tight semiconductor production capacity and help customers meet the storage needs of the global market.

[PHISON's Quick Facts]

- Over 20 years experiences in NAND controller IC design and module integration.
- Over 2,500 employees globally, and more than 75% are engineers
- Over 2000 memory-related patent globally.
- 3 major focuses: enterprise, embedded, and consumer market.
- 600M average annual controller shipment.
- $1.63B sales revenue in 2020.
- Confident that our unique business model can produce consistently strong cashflows and profits over the long-term amidst NAND memory market cycles.
- Strongly maintain long-term partnerships with our global NAND flash supply sources and with our downstream module customers.

[About PHISON]

Phison Electronics Corp. (TPEX:8299) is a global leader in NAND Flash controller IC and storage solutions. We provide a variety of services from controller design, system integration, IP licensing to total turnkey solutions, covering applications across SSD (PCIe/SATA/PATA), eMMC, UFS, SD and USB interfaces, reaching out to consumer, industrial and enterprise markets. As an active member of industry associations, Phison is on the Board of Directors for SDA, ONFI, UFSA and a contributor for JEDEC, PCI-SIG, MIPI, NVMe and IEEE-SA.
